Office Survival Tips For Interns and Newbies

The recent physical abuse of an intern has cast a spotlight on how companies treat students doing their internship. Many have begun to question if there are many similar cases that have gone unreported out of fear.

There may also be other abuses that may not tantamount to injuries caused by physical hurt yet, it has just as much impact- the mental and verbal abuse. When faced with these situations, what should interns or even new employees do and how should they protect themselves.

In a series of interview done my Omy.sg, Our Group Managing Director, Ms Annie Yap gives her take on what forms of actions are considered unacceptable and some of the effective solutions that can be undertaken by interns or new employees to protect themselves.

The video interview is available at the following links:
